

*Water Polo*

## OPERATING INSTRUCTIONS

**SC30 Eco / 4SC30 Eco**

**SCX30 Eco / 4SCX30 Eco**

*Non-binding pictures*

## ● GENERALITIES

SC30 Eco & 4SC30 Eco: Equipment for indoor use only.

SCX30 Eco & 4SCX30 Eco: Equipment for outdoor use.

The control console and the horn / power supply box should be protected against bad weather conditions (during the operation but also when the equipment is not in use).

Use a soft dry cloth to clean the equipment.

### Scope of delivery

**Display units (SC30 Eco & SCX30 Eco: 2 display units / 4SC30 Eco & 4SCX30 Eco: 4 display units)**

- ✓ Installation on the floor.
- ✓ The display units indicate the ball possession time to the spectators, teams and referees.
- ✓ Dimensions: 500 x 300 x 65 mm - Weight: 2 kg.
- ✓ The display units are powered by the horn / power supply box. They should only be connected to the STRAMATEL system supplied.

### Horn / power supply box

- ✓ Place at least 2,5 meters far from the pool edge.
- ✓ It Supplies power to the display units and the control console.
- ✓ Dimensions: 140 x 140 x 200 mm - Weight: 1,85 kg.
- ✓ Class I equipment – Must be connected to earth.
- ✓ Power supply: 100-240V 50/60Hz 0,60-0,25A.
- ✓ Power consumed: 60VA (max).
- ✓ Protection : external fuse 5x20mm 1,6A (on the side of the box).
- ✓ Horn loudness (115dBa at 1m):  the high sound pressure can deteriorate hearing. Therefore, the spectators should be kept at a reasonable distance from the horn. The horn is not equipped with the possibility to adjust the loudness of its sound.

### "30 seconds" control console

- ✓ This console enables to control the ball possession time in Water Polo.
- ✓ This console enables to control a timer in "Swimming Training" mode.
- ✓ Dimensions: 145 x 150 x 40 mm - Weight: 180 g.
- ✓ This console is powered by the horn / power supply box. It should only be connected to the STRAMATEL system supplied.

### 20-meter and 60-meter flexible cables

- ✓ These cables enable to connect the display units to the horn / power supply box and to connect the display units to each other (4SC30 Eco & 4SCX30 Eco).
- ✓ Use only the cables supplied by STRAMATEL.

### 2-meter flexible cable (if supplied)

- ✓ This cable enables to connect the "30 seconds" control console to the other control consoles (5 pin-sockets on the control consoles) or to a WTOP.
- ✓ Use only the cable supplied by STRAMATEL.

### Environment and recycling

Please help us to protect the environment by disposing of the packaging in accordance with the national regulations for waste processing. **Recycling of obsolete appliances:** appliances with this label must not be disposed off with the general waste. They must be collected separately and disposed off according to local regulations.

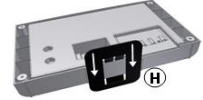

## Installation of the system

**Caution:** For security reason,

- ✓ the system must not be connected to mains before installation has been fully completed.
- ✓ the the horn / power supply box should be placed at least 2,5 meters far from the pool edge.

Clamp the stands (H) under the display units.

4SC30 Eco & 4SCX30 Eco: connect the display units to each other using the 60-meter cables.

Connect the display units to the horn / power supply box using the 20-meter and 60-meter cables.

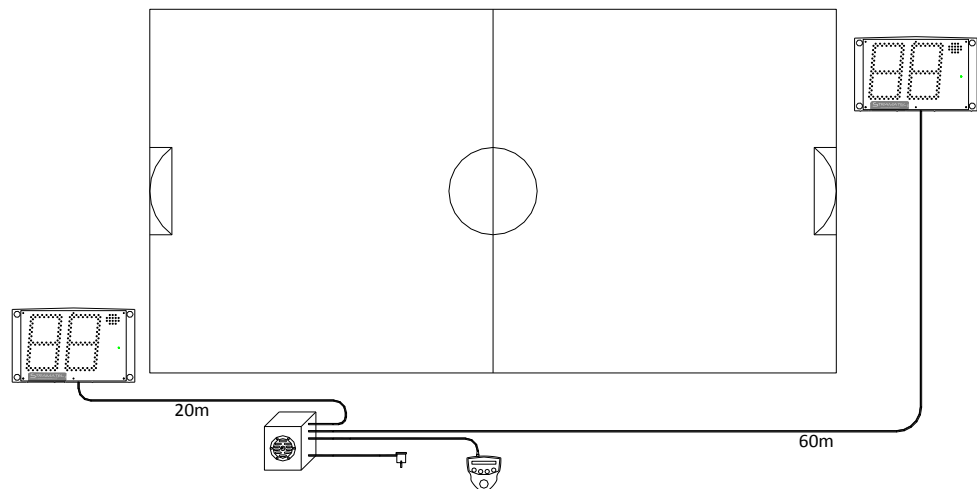

Connect the cable of the horn / power supply box at the back of the control console.

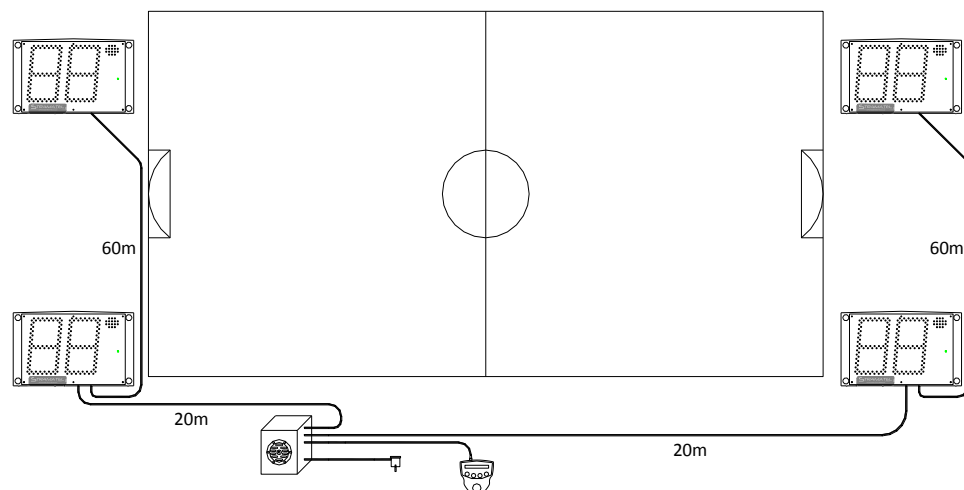

Plug the mains cable of the horn / power supply box into an appropriate mains (+ earth) outlet (the socket should be as close as possible to the box and must be easily accessible).
